Volume contents

Volume 103 (1999)

R.P.D.I.I. Morse, L.D. Ma, R.L. Magin, F. Dunn (USA) *Ultrasound interaction with large unilamellar vesicles at the phospholipid phase transition: perturbation by phospholipid side chain substitution with deuterium* 1

F.B. Pereira, J.M. Valpuesta, G. Basañez, F.M. Goñi, J.L. Nieva (Spain) *Interbilayer lipid mixing induced by the human immunodeficiency virus type-1 fusion peptide on large unilamellar vesicles: the nature of the nonlamellar intermediates* 11

S. Nuss, C. Mioskowski, L. Lebeau (France) *Synthesis of new fluidity-enhanced amphiphilic compounds for soluble protein two-dimensional crystallization purpose* 21

L. Lebeau, S. Nuss, P. Schultz, P. Oudet, C. Mioskowski (France) *Self-assembly of soluble proteins on functionalized lipid layers: a tentative correlation between the fluidity properties of the lipid film and protein ordering* 37

L. Mannina, C. Luchinat, M.C. Emanuele, A. Segre (Italy) *Acyl positional distribution of glycerol tri-esters in vegetable oils: a ^{13}C NMR study* 47

A. Tahir, C. Grabielle-Madelmont, C. Betrencourt, M. Ollivon, P. Peretti (France) *A differential scanning calorimetry study of the interaction of Lasalocid antibiotic with phospholipid bilayers* 57

L. Pogliani, P. Rossi, P. Paoli, M. Ceruti, M. Milanesio (Italy) *Conformational and dynamical study of squalene derivatives. II — Vynil oxidosqualenes* 67

L. Pogliani, M. Milanesio, M. Ceruti, D. Viterbo (Italy) *Conformational and dynamical study of squalene derivatives. III: azasqualenes and solvated squalene* 81

A. Schöppe, H.-J. Hinz, R. Gerdes, H. Redlich, G. Rapp (Germany) *Activation energies and kinetics of glycolipid phase transitions* 95

P. Allevi, A. Longo, M. Anastasia (Italy) *Synthesis of 5α,8α-ethanoergosta-2,6,22-triene-2′β-hydroxymethylene-1′β-carboxylic acid lactone, a key intermediate for the synthesis of a brassinolide analogue* 117

Z.-Q. Liu, W. Yu, Z.-L. Liu (People's Republic of China) *Antioxidative and prooxidative effects of coumarin derivatives on free radical initiated and photosensitized peroxidation of human low-density lipoprotein* 125

W. Li, J.B. Lagowski (Canada) *Ab initio study of phospholipid headgroups: GPE and GPC* 137

R. Gambino, G. Ruiu, G. Pagano, M. Cassader (Italy) *Study of the glycosylation of apolipoprotein H* . 161
